Assignment 1

1.Write a program to insert the element into an array at given position

```python
print("Enter the 5 Elements of List: ")
nums = []
for i in range(5):
    nums.insert(i, input())
print(nums)
print("Enter an Element to Insert at the 3rd position: ")
elem = input()
nums.insert(3,elem)
print("The New List is: ")
print(nums)
```

```
Enter the 5 Elements of List:
2
4
5
5
6
['2', '4', '5', '5', '6']
Enter an Element to Insert at the 3rd position:
34
The New List is:
['2', '4', '5', '34', '5', '6']
```
